Type	Description	Owner	Deadline
Decisions	We will only be working on logistic application of the drone and it will be web-based.	-	-
Tasks	1. Study the exisitng codebase and come up with 10 ideas of which 5 will be finalized for now. 2. Study about Qgroundcontrol, pixhawk drones	-	Preferably the next weekly meeting scheduled for 25th of January.
Information	- 4G telemetry model used for communication between drone and AWS server. - Track fleet of drones and there are different views for user, technician, admin. - Track all the drones and store their trajectories in the database and a button will allows us to view the trajectory for a particular/all drones.	-	-
